NYLON PIPES: Nylon tubing are made from Nylon 12. Avoid low cost pipes made of Nylon 6 and Copolymers. We offer our new 5/8" and 3/4" Nylon tubing from small to medium size greenhouse range.

3/8" is used only as nozzle lines.

1/2" tubing is used as a supply line for 3/8" misting lines. Our new 5/8" and 3/4" large tubing are used as main supply line to 1/2" tube lines.

Maximum permissible pressure is 80 Bar. Burst pressure is 120/140 Bar. We have many greenhouses working for 10 years without trouble.

It is also possible to combine Stainless Steel pipes and Nylon pipes in the same greenhouse.

For any kind of installation, Stainless Steel or Nylon 12 our warranty is 5 years for the distribution network.

PLC UNIT FOR GREENHOUSES

Greenhouse consisting of four independent sections requires 100 LPM simultaneous misting. Thanks to our PLC controlled high pressure solenoid valve unit, a programmed misting of each independent unit one after another is an economical solution with an only 25 LPM high pressure pump for whole greenhouse.
